Skills

Web Development: HTML, CSS, JavaScript, GSAP, React, Js, React Three Fiber, React Redux, Tailwind CSS, MongoDB, Typescript, Firebase, Shopify, WordPress, TanStack Query, Express, NodeJs.

Machine Learning & Deep Learning: Skilled in developing and deploying image classification and object detection models using CNNs, ResNet, DenseNet, EfficientNet, and YOLO, with experience in preprocessing, training, and real-world integration.

Work Experience

Enfotrix, Sargodha, Feb 2024 - Mar 2025 Web Developer

Developed teacher and admin panels for a school management system, as well as a physiotherapist web app using React and TypeScript, focusing on responsive UIs and efficient data management.

Maaz Informatics (CM IT Internship Program), Sargodha, Jan 2026 - Jun 2026 MERN Stack Developer

Contributed to various high-impact web projects and spearheaded the frontend development of the company's internal Management Information System (MIS).

Education

University of Sargodha, Nov 2021 - Jun 2025 BS in Software Engineering with CGPA: 3.94/4

Project Work

- **YouTube Inventory System:** Built a comprehensive React-based ERP system for channel traders, featuring advanced multi-layer search filters, financial analytics via Recharts to track profit/loss and status for large-scale channel inventories, and dedicated tracking for purchased, hacked, or terminated channel data.
- **Course Selling Platform:** Developed a full-featured course selling platform with user and admin panels using the MERN stack.
- **ESBO Global USA (WordPress, Elementor, Custom JS/CSS, WooCommerce):** Engineered a futuristic, high-performance platform using a custom Bento Grid layout and native Dark Mode switcher, achieving elite PageSpeed scores (94 Mobile / 96 Desktop) with custom JS/CSS and full WooCommerce integration, handling everything from branding to development.
- **Doritaaga E-Commerce (React.js, Firebase, TanStack Query, Resend, Stripe):** Developed a full-stack React/Firebase store and admin suite featuring real-time inventory management, automated Resend notifications, and seamless payment integration.
- **Real Rummy Apps:** A robust admin panel enables full control of game, category, blog, and Telegram link management for streamlined platform operations. Players enjoy a clean, user-friendly interface for exploring and downloading Real Rummy APKs.
- **Blemish Bot:** Built a two-model acne detection system: ResNet50 for clear vs. acne-prone skin, and DenseNet-121 for detecting 7 acne types. Handled image blur validation and deployed using the MERN stack with real-time analysis and skincare recommendations.
- **Tomato leaf disease detection:** Achieved 94.70% accuracy using ResNet-18 for tomato leaf disease detection. Applied data augmentation and deployed the model via Flask API for real-time predictions..
- **Teacher Panel of the School Management System:** Developed a secure, responsive teacher panel using React and TypeScript with class, attendance, fee, and schedule management features.
- **Physiotherapist web app:** Created a React/TypeScript-based interface for therapists to manage appointments, billing, and patient data with real-time updates.
- **Shopify development (Shopify, Zapier, Google Analytics/GTM):** Spearheaded development for brands like Kaيرا Luxury, VasuSetu, Elexci, and Suriya String, integrated **automated WhatsApp reminders, Zapier WorkFlows**, advanced tracking via Google Tag Manager and Analytics.

Awards and Certificates

- I completed the "AI Business and Future of Work" course at Lund University.
- I earned a professional certificate in **Digital Marketing from the University of Illinois Urbana-Champaign**.
- I received a certificate from **Google in "Bits and Bytes of Computer Networking"**.
